Warranty Policy

1/23/2013

Qwest Air Parts, Inc. warranties items sold using the following guidelines:

A. Items sold in conditions of "Serviceable, Overhauled, Newly Overhauled, and Factory New" are warranted for the same period of time that the Repairing Facility or Manufacturer warranties the product. These conditions apply to items with current 8130's, EASA's, or Manufacturer's Certifications.

B. If an item is sold with an older Certification Date with the type Certifications as mentioned above, Qwest will warranty that item as "Turn On" only. This will be stipulated to the customer at time of purchase.

C. Items sold in "As Removed" condition are warranted to be "Guaranteed Repairable" if sold at or above a base price of \$500.00. "Guaranteed Repairable" does not mean that the item is functional or will turn on. Qwest only guarantees that item to require normal repair costs and is not beyond economical repair (BER).

D. Qwest Air Parts, Inc. has a Minimum Order price of \$250.00. A customer may purchase an item at that price, but will not get the "Guaranteed Repairable" stipulation to that purchase. Items sold at individual prices below \$500.00 are sold "AS IS, WHERE IS" with no returns or refunds available.

E. Items improperly installed, modified, or misused are not eligible for return.

F. Before any warranty consideration is approved, Qwest Air Parts, Inc. maintains the right to receive and inspect the item for verification of fault. If fault is not found, the item will be returned to the customer.
